EMPLOYMENT HISTORY

Senior Frontend Engineer

MobileKings (October 2023 – Now)

- Spearheaded the redesign of MobileKing Website and devised an extensive feedback system for augmenting user engagement with articles through Next.js Server-Side Rendering.
- Played a crucial role in automating CI/CD pipelines using GitHub workflows and a versioning system, which resulted in a 25% reduction in deployment times and significantly boosted the team's delivery capacity.
- Implemented a chat interface in IQ GPT, featuring a history display and real-time updates of questions and answers using LLMS and Langchain.
- Collaborated closely with the design team to develop interconnected (linked) wikis and a sophisticated notification system. This was achieved using Redux Toolkit and GraphQL for API connections, enabling the storage of user preferences and the creation of event pages.

Frontend Developer Intern and Freelancing

McG Technologies (January 2020 - March 2023)

- Gained foundational and intermediate frontend development skills while working with the Company's Team.
- Developed basic web components using SCSS, enhancing the user interface and experience.
- Actively involved in the testing and debugging bugs during the revamp of the Company's site.
- Worked as a freelancer to gain some personal experiences and to know the differences between working alone and working with a group of people as a team.

PROJECTS

- **LANSTUR:** A website that specializes in freelance services like market place, gig listing and promotion/Ads.
- **DINE:** A website for restaurants to market their food, take orders and make payment without leaving your comfort zone.
- **BATR:** I am still currently working on it and I do not want to disclose any information about it until it is being launched.
